

95 and 90 Gas Furnaces

YOUR HOME DESERVES  
A HIGHER STANDARD OF COMFORT.

BUILT TO A HIGHER STANDARD™

*American Standard*®

HEATING & AIR CONDITIONING

# RELIABILITY, THROUGH AND THROUGH.

American Standard's reputation for performance and reliability has its reasons. Every gas furnace we produce includes an array of innovative features carefully constructed to not only create a comfortable environment in your home, but also give you the utmost in energy efficiency and durability. It's an approach we stake our reputation on and an approach your family can enjoy for years to come.

## 1 AccuLink™ communicating capability with user interface\*

Enables your system to communicate to the Comfort Control; gives you the ability to monitor remotely and even relays diagnostics for responsive maintenance.

## 2 Three-wire connection

Simplified connection to the Comfort Control enables faster, easier installation that is less invasive to your home.

## 3 Variable-speed ECM blower motor with Comfort-R™

Operates at a lower, more efficient speed than conventional blower motors, while our exclusive Comfort-R™ feature ensures greater humidity control during cooling.

## High Efficiency ECM blower motor

Works to help increase your overall cooling efficiency when installed as part of a complete system.

## 4 Variable-speed induced draft venting

Variable-speed draft blower assembly quietly draws hot gases through the heat exchanger to maximize heating.

## 5 Durable hot surface igniter

Starts burner electronically for safe, efficient operation. This eliminates the need for a fuel-burning pilot light.

## 6 Fully modulating gas valve

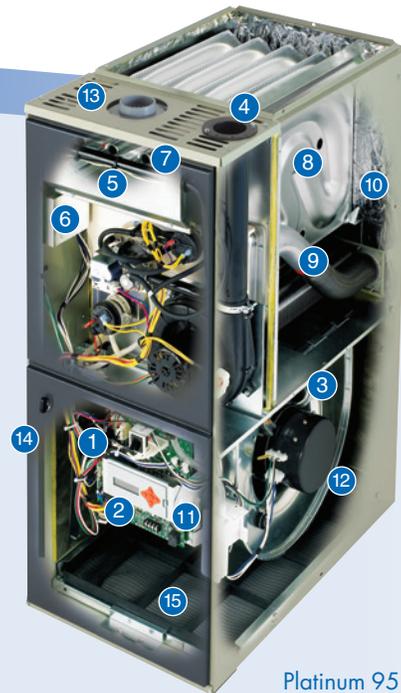

Highly reliable, proven design operates between 40% and 100% , like a light bulb with a dimmer switch, to meet your home's real-time heating needs, providing ultimate comfort and efficiency.

## 7 Multi-port in-shot burners

Perfectly shape the flame cone to maximize heating while using less fuel.

## 8 Aluminized steel primary heat exchanger

Crimped, not welded, to prevent cracks from heat stress. Stamped serpentine channel offers the greatest efficiency in less space.

Platinum 95

## 9 Stainless steel secondary heat exchanger

Made of AL29-4C stainless steel to capture more of the heat you pay for.

## 10 Heavy steel insulated heat exchanger cabinet

Durable, quiet design holds more heat in the furnace to better warm your home.

## 11 Self-diagnostic controls

Manage every function with digital accuracy. Includes safety features and a built-in troubleshooting system.

## 12 Sound-insulated blower compartment

Ensures the quietest possible operation.

## 13 100% fresh air option

Uses 100% outdoor air for combustion to increase equipment life.

## 14 Dual door latches (Upflow models only)

Allow easy access to the filter for cleaning or changing.

## 15 Cleanable filter

Means you can rinse or vacuum it without buying replacements each time.

Features and components may vary by model and are shown for illustration purposes only.

\*An American Standard AccuLink™ Platinum 1050 connected control or Gold 900 thermostat is required for communicating capability on Platinum 95 modulating furnaces.

## Platinum Series Gas Furnace

Our most efficient and powerful gas furnace just might be our most comfortable too. With AccuLink™ communicating capability, continuous Comfort-R™ mode and an array of other innovative features, the Platinum Series gives your home maximum efficiency with controlled comfort.

\*Registered Limited Warranty terms are available when you register within 60 days of installation. You can register online at [americanstandardair.com](http://americanstandardair.com) or by phone at 800-554-8005, otherwise American Standard Heating & Air Conditioning's Base Limited Warranty terms will apply. Base Limited Warranty information on specific products can be found on [americanstandardair.com](http://americanstandardair.com). An option to purchase transferability of your Registered Limited Warranty is available. For more information visit [americanstandardair.com](http://americanstandardair.com).

As part of our continuous product improvement, American Standard Heating & Air Conditioning reserves the right to change specifications and design without notice. Read important energy cost and efficiency information available from your dealer. For installation in SCAQMD only: This furnace does not meet the SCAQMD Rule 1111 14 ng/J NOx emission limit, and thus is subject to a mitigation fee of up to \$450. This furnace is not eligible for the Clean Air Furnace Rebate Program: [www.CleanAirFurnaceRebate.com](http://www.CleanAirFurnaceRebate.com).

## Designed for comfort. Built to last.

For more than a century, families have trusted American Standard Heating & Air Conditioning to keep their homes comfortable. Today, our home comfort systems continue to push the boundaries of efficiency and performance, while still delivering on our proud history of quality, durability and substantial value. Welcome your family home to a higher standard of comfort. From American Standard Heating & Air Conditioning.

## Run your home from wherever life takes you.

Nexia™ allows you to manage your home remotely using most web-enabled mobile devices.\* With just the touch of a button, you can unlock a door or turn on lights for security, or monitor and adjust your heating and cooling from a distance to save energy. Simply put, Nexia™ gives you and your family all the promises of home automation in the most simple and accessible way. All so you can connect with your home, even when you're not at home. Ask your American Standard Heating & Air Conditioning dealer for details.

\*Nexia Remote Climate Access is included with the purchase of a connected control. Adding accessories to your Nexia system requires a monthly subscription for remote access via most web-enabled smartphones and computers.

Select furnaces are **ENERGY STAR® Qualified.**  
Ask your dealer for specifics.

The ENERGY STAR program is a joint effort between the U.S. Environmental Protection Agency and the U.S. Department of Energy designed to help consumers identify energy-efficient products. When you see the ENERGY STAR symbol, you know your air conditioner will help reduce your energy consumption and help the whole planet stay comfortable.

## Our dealers will put you in your comfort zone.

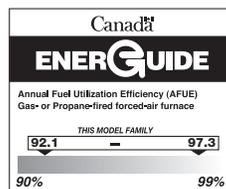

Your independent American Standard Heating & Air Conditioning dealer is a highly trained professional with years of experience who'll work with you every step of the way in choosing the system that's right for you – from walking you through the entire purchasing process to conducting an in-depth analysis of your home and your comfort needs. Based on that information, your dealer will recommend a system that works best for your home. After all, the more efficient the system, the more comfortable you'll be.
