

Charging Scale

2-VALVE MANIFOLD

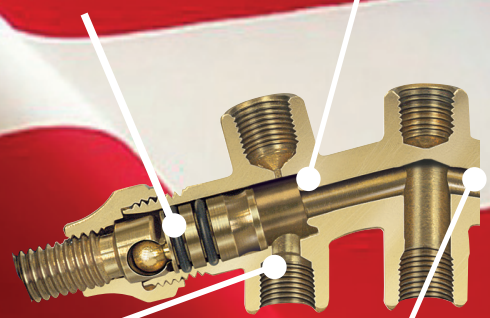

THE MANIFOLD THAT SETS THE INDUSTRY STANDARD

M2-5-410AB shown with boots

Zero leakage high pressure raised seat for positive seating

Double O-ring

Stem seats retract completely from full flow path

Double size flow path throughout length of center port

MADE IN THE USA

JB's M-2 series sets the industry standard for entry-level brass manifolds. Built with our famous full flow design featuring dual o-rings and stem seats that retract completely from flow path result in faster evacuation and charging. Our bar is longer and angled for better knuckle clearance when turning the hand wheels 2-1/2 turns to full open/close. R-410 is available alone or in combination on all size gauges.

C ONSTRUCTION	Forged Brass	Heavy Duty & Rugged	O RIGINS	USA	All components
H ANDLES	Plastic contoured hand wheels	Only 2 1/2 turns to full open/close	D ESIGN	Double O-Ring Piston	Stem seats retract fully for full unrestricted flow
G AUGE SIZES	Steel 2 1/2, Steel 3 1/8 (Glow in the Dark) Steel 3 1/8 (Liquid filled)	More sizes and options than competition	R EFRIGERANTS	Combinations include new R-22 replacements R-422 and R-407	More combinations and new refrigerants to serve any application
B OOT	Red and Blue 2 1/2 Black 3 1/8	Heavy duty protection
