

Carbon Monoxide Detectors

Effective July 1, 2009:

The state of Colorado has passed a law requiring all newly constructed, existing and rental dwellings that have a fuel-fired heater or appliance, a fireplace or an attached garage to have carbon monoxide alarms installed.*

City permits now require a CO detector in the house. Have them on your truck for a sale.

Quantity Pricing

24 or more = 5% off
60 or more = 10% off

CO alarms are required to be installed within 15' of entrance to each sleeping area and must be:

- Wired to AC power
- Plugged into an outlet without a switch
- Or if battery, attached to the wall or ceiling per NFPA 720

After 07/01/09 New construction & existing dwellings that require a permit and existing rental dwellings upon change in the tenant occupancy must comply with the law.

Kidde alarms are UL listed and approved for installation and come with a 5 year limited warranty.

*For your specific compliance requirements please refer to the actual language of HB 1091 by logging onto: www.leg.state.co.us or consult legal counsel.
