

Locking Refrigerant Caps

Effective February 2009,

The IMC and IRC now require that all outdoor access ports be made tamper resistant.*

***IMC 1101.10 Locking access port caps. "Refrigerant circuit access ports located outdoors shall be fitted with locking-type tamper resistant caps."**

***IRC M1411.6 Locking access port caps. "Refrigerant circuit access ports located outdoors shall be fitted with locking-type tamper resistant caps."**

The NOVENT locking vent is the answer!

Caps fit the standard "Schrader" service valve on all central AC units and Minisplits, and provide an innovative way to prevent access by unauthorized persons. Patented NOVENT® Caps are precision machined from high grade brass surrounded by a protective aluminum shroud and can only be fitted and removed with a special tool.

Benefits:

- Seal service valve to prevent leaks
- Prevent excessive energy usage due to refrigerant loss
- Help prevent illegal venting of refrigerant
- Support every EPA management program
- Help prevent accidental mixing of refrigerant
- Deter refrigerant theft at unsecured sites
- Help prevent access by unauthorized persons
- Help prevent loss from cylinders and recovery tanks
- Reduce potential liability for inhalation induced injury or death
- Corrosion resistant
- Integral torque limiter prevents over tightening
- Resist crushing and removal without key
